

## **SPECIFICATION AMENDMENTS**

Please delete the following paragraph between Paragraphs 22 and 23:

~~Whereas with lotteries generally, the payout increases with the number of entrants, applicants' game of chance is limited to specific number of game tickets 50 with a pre-determined payout. If additional players wish to enter, a second game (with an associated second record set) is required. For the second game with the associated second record set, the second game payout is once again pre-determined. If the number of entrants exceeds the total number of game tickets 50 associated with the first game and the second game, yet a third game (with an associated third record set) is required. Thus applicants' game of chance provides a pre-determined payout for a fixed number of entrants, and the number of entrants is limited to the number of game tickets 50 in a record set.~~

Please amend the Summary of the Invention, paragraph 8 as follows:

Applicants' invention provides a method and apparatus for a game of chance wherein, for a particular subject, wherein the subject can be either a single event or a series of related events, the ~~participate~~ entrant pays an entry fee and is eligible to receive a payout based on predetermined criteria.

Please amend the Detailed Description of the Invention, paragraph 25 as follows:

Still referring to Figure 2, the player information record portion 68 provides a place for the ~~participant~~ entrant to record the ~~participant's~~ entrant's contact information.

Please amend the Detailed Description of the Invention, paragraph 27 as follows:

Referring now to Figure 3, the game administrative record portion 54 of the game record 50 includes, as a minimum, the unique game record identifier 56 which mirrors the game record identifier 56 on the entrant retention portion 52 of the game record 50.

Optionally, the game administrative record portion 54 can also contain contact information about the ~~participant~~ entrant (mirroring player information box 68), a second game information record portion 70 and a third game information record portion 72.
